Mission Statement

Our vision is to be a leading world-class IT consulting firm. We will achieve the global leadership by helping the clients achieve their strategic IT goals by providing innovative and high quality IT solutions using our world-class Service offerings. We will add value to these IT Solutions through our uncompromising commitment to client satisfaction.

Some of Our Esteemed Clients

About Us

IT Gurus, a Chicago based world class IT consulting firm has been providing consulting services since 1998.

A proven leader in the software consulting market place, IT Gurus solves critical information systems challenges for companies of all sizes, across all industries.

Our consultants are well qualified and trained, customer focused and experts in established and emerging technologies.

Our consultants are a powerful resource for innovative ideas that will advance your organization.

Today's most progressive businesses and organizations are successfully changing the way they approach their technical challenges with the help of IT Gurus.

Our Gurus are available nationwide to provide contractual services to fill both long term and short term needs, even on a short notice. Our exceptionally qualified and flexible consultants can manage the project independently or work under the client supervision to meet the specific requirements.

IT Gurus client relationship managers are highly experienced and trained in current technology trends to understand client needs and match their needs with right consultants from our talented resource pool.
